FACT/TIP: When measuring weight smaller items can be put together to have the same weight as a heavy item.

PRACTICE EXAMPLE:

Look at the scale. How many lemons have the same weight as the sneakers? _______

There are 5 lemons on the scale. That means that 5 lemons have the same weight as the sneakers.

Your answer is 5.
ON YOUR OWN

Look at the scale, how many lemons have the same weight as the cell phone? _______

Look at the scale, how many lemons have the same weight as the toy train? _______

HOMEWORK

Let’s pretend that we sell in a market. Draw a stall with fruits and vegetables. Draw yourself measuring an item on a scale in the box below. HAVE FUN!
