FACTS/TIPS: One hour has 60 minutes. The half of 60 is 30.

To show half past the hour the minute hand must be at six (6).

PRACTICE EXAMPLE:

Draw a clock to show half past 8.

The first thing we do is draw in our hour hand (short hand). I’m drawing to show the time half past 8. 8 is the hour. So, I’ll draw in my hour hand (short hand) half way between 8 and 9.

Next, we draw in the minute hand (long hand). Since it’s half past we know that the long hand must be at six.
That is how we draw in hands to tell time.

**ON YOUR OWN:**

Draw in hands on the clocks below to show the given time.

- **half past 7**
- **half past 5**

**HOMEWORK**

John left home at 8:00h. He spent half hour to walk to school. What time did he reach to school?

Put hands in the analog clock to show the time John arrived at school.
