Name: ___________________    Date: __________________

**FACT/TIP:** We can tell how much time passed between months by looking at a calendar.

**Practice Example:**

Look at the calendar and answer the questions.

How many months would be from September to December?

![Calendar Image]

We have to count every month from September to December. There are 4 months from September to December.
ON YOUR OWN

Look at the calendar and answer the questions.

1. How many months would be from January to May? ____________

2. The third month of the year is ______________.

3. How many months are there from June to September? _________
