Name: _______________________
Date: _____________________

Tips/ Facts: One hour has 60 minutes. A quarter of 60 is 15. To show quarter past the hour the minute hand must be at three (3).

Practice Example:
On a clock, when the minute hand (long hand) points to 3 it is quarter past the hour.

The minute hand (long hand) is at three (3), that means, it is quarter past the hour. That means, it is quarter past 12. Quarter past 12 written in digital form is 12:15.

Your answer is quarter past 12 or 12:15.
ON YOUR OWN

Look at the clocks below. Write the time on the lines.
