Tips/ Facts: One hour has 60 minutes. Quarter to the hour is 45 minutes. To show quarter to the hour the minute hand must be at nine (9).

Practice Example:
On a clock, when the minute hand (long hand) points to 9 it is quarter to the hour.

The minute hand (long hand) is a nine (9), that means, it is quarter to the hour. That means, it is quarter to 2. Quarter to 2 written in digital form is 01:45.

Your answer is quarter to 2 or 1:45.
ON YOUR OWN

Look at the clocks, then write the time on the line.
