

PREFACE

In keeping with Ministry of Education policy of continuous updating of its curriculum guides, a team of experienced teachers under the guidance of curriculum officers in Social Studies undertook the task of revising the social studies Curriculum for Primary Schools. This revision takes into account the revised Scope and Sequence for Primary School Social Studies.

The revision was done along a number of principles and reflects a number of features: These are:

- the spiral arrangement of content across the levels
- defining objectives to cater for the three intellectual domains – cognitive, psychomotor, affective
- the integration of the other curriculum areas into social Studies
- an interactive methodology in teaching the subject
- the use of assessment strategies that go beyond the traditional paper and pencil test

The Easy Path Series **Social Studies for Our Children** is an integral support for this guide. Some concepts in this Guide may require using other supporting texts to enhance the interactive approach.

The teaching strategies suggested would allow children to explore, investigate, and discover the foundation principles of social relations thus enhancing their chances of succeeding in Social Studies beyond the primary level. Learning in such an enriched Social Studies environment will bring to the fore the joy of learning.
